

LGBTQ+ and Multiracial Demographics in WMPD: Opportunities and Challenges for Inclusion

Wednesday, May 12

1 PM - 2 PM ET

On April 29th, the National Science Foundation (NSF) released the 2021 report ‘Women, Minorities, and People with Disabilities (WMPD) in Science and Engineering.’ This biennial report by the National Center for Science and Engineering Statistics (NCSES), within the NSF, provides critical information about underrepresented groups in science education and employment.

In this panel, scholars will discuss LGBTQ+ and multiracial demographics in our country and within STEM fields — and how this report might best serve diversity and inclusion in the future.

Panelists

Jon Freeman, PhD, NYU

Sandra Graham, PhD, UCLA and FABBS Board Member

Michael Medina, Research fellow, UC Davis

Adrienne Nishina, PhD, UC Davis
